

# ROADSTONE **CUBICLE LIME**

## A natural antibacterial **bedding** for livestock

- Roadstone Cubicle lime is produced from a high calcium limestone sourced directly Roadstone quarries.
- Cubicle Lime can assist in protecting livestock against disease and infection.
- The powdered lime is highly absorbent ensuring that livestock are cleaner and drier.

## ADVANTAGES

- Reduces risk of environmental mastitis and reduces SCC
- Assists in the control of odour

## FEATURES

- Highly absorbant
- Finely ground to allow for high surface area coverage
- Adds value to slurry for application to soil
- Suitable for range of housings including stables, calf houses and lambing boxes

Available in  
**1tn or 25kg  
bags**

## Hydrated Cubicle Lime

The added benefit of hydrated lime offers additional protection to livestock from disease and infection. **Using a blend of high calcium and hydrated lime will inhibit the growth of pathogenic bacteria.**
