As modelled by NSAI registered Thermal Modellers:

- All options pass R/Si assessment, no surface condensation predicted
- All Blocks (Including Thermal Liteblocks) to be minimum 7.5N in accordance with section 1.1.3.5 TGD Part A 2012

Cavity Wall U-Values vary, see appendix D of TGD part L 2011.

Ensure ventilation to roof space is maintained, as required by current building regulations.

The diagrams, drawings and details included in this brochure are for indicative purposes only. They do not constitute nor should they be relied upon or used/paved over any design detail. They focus on the issues of thermal performance only. Insulation thicknesses or the raw building elements have not been provided as these are dependent on the thermal properties of the materials chosen, as well as on the desired R value. These diagrams, drawings and details illustrate good practice for the design and construction of interventions solely in connection with thermal performance. The product should be used with due regard to all other requirements imposed by the Building Regulations and advice should be sought from a design professional in connection with the use of this product where required.
