Ensure wall insulation is installed at least 225mm below top of floor insulation. Floor insulation to tightly abut blockwork wall with a minimum R-value of 2 m²K/W.

In both the 0.21 U Value Range and 0.15 U Value range the models surpasses the default Psi value and therefore a y-value of 0.08 can be assumed using this option without a y-value calculation, provided all other details in the building comply with the published ACDs and/or Roadstone modelled details.
